Job Role Key Information

- Associate Job Title: Design Architect
- Sub-Industry: Architecture
- Task: Architecture
- Field of Study: Architecture
- Qualification: Bachelor's Degree or Equivalent
- Monthly Salary: 2200 to 7000 (S\$ 700.00 - S\$ 2300.00 per month)

Job Role Description

The Architect plans, designs and supervises the construction of buildings and other physical infrastructure. He/She helps to prepare project specifications and detailed drawings on architectural works for their clients. He/She takes into account the clients' needs, purposes of construction, the shapes and levels of land used and the clients' budgets. He/She is personally involved in bringing the project to fruition, by advising the clients on project execution or supervising the progress and quality of work on-site. This may include arranging contracts between clients and builders, visiting construction sites to ensure that work is properly done and to discuss any construction problems that may have arisen, as well as liaising with people from Government departments and private organisations. He/She represents the clients.

He/She may work in a variety of architectural or multi-disciplinary consultancies alongside other professionals such as engineers and quantity surveyors. Some overtime and weekend work may be required when project deadlines are looming.

Tasks

- Accountable for the clients' needs and purposes of construction.
- Advise the clients on project execution.
- Arrange contracts between clients and builders.
- Be responsible for the design of the building and the materials used.
- Help to ensure the building project meets the clients' budget.
- Oversee any construction problems that may have arisen, as well as liaising with people from Government departments and private organisations.
- Prepare project details and drawings for clients.
- Supervise the progress and quality of the work on-site.
